

# AquaPure X1 — Smart Water Purifier User & Service Manual

Synthetic multimodal RAG training data. The manual contains both text and visual evidence.

**Product overview:** AquaPure X1 is a fictional home water purifier with three filtration stages, touch controls, filter-life monitoring, and an automatic flush cycle.

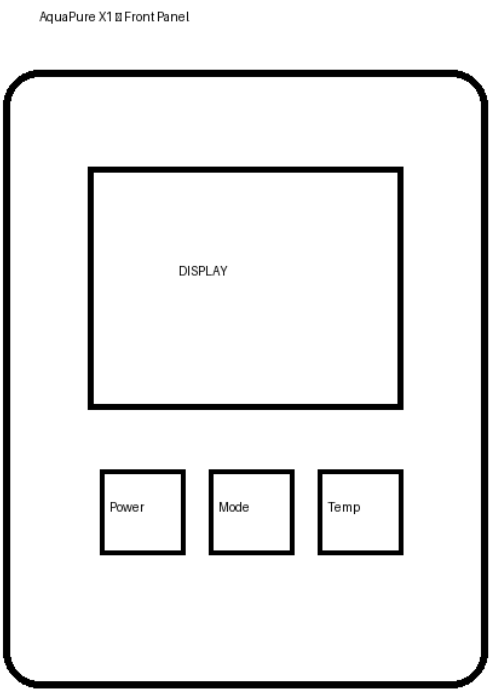

Figure 1: Front panel.

## 1. Operating modes

**Normal:** Default mode for everyday operation.

**Eco:** Reduces pump activity for lower water demand.

**Flush:** Cleaning cycle; use after filter replacement and when indicated.

**Temperature:** Changes output temperature only; it does not change filtration stages.

## 2. Filter system

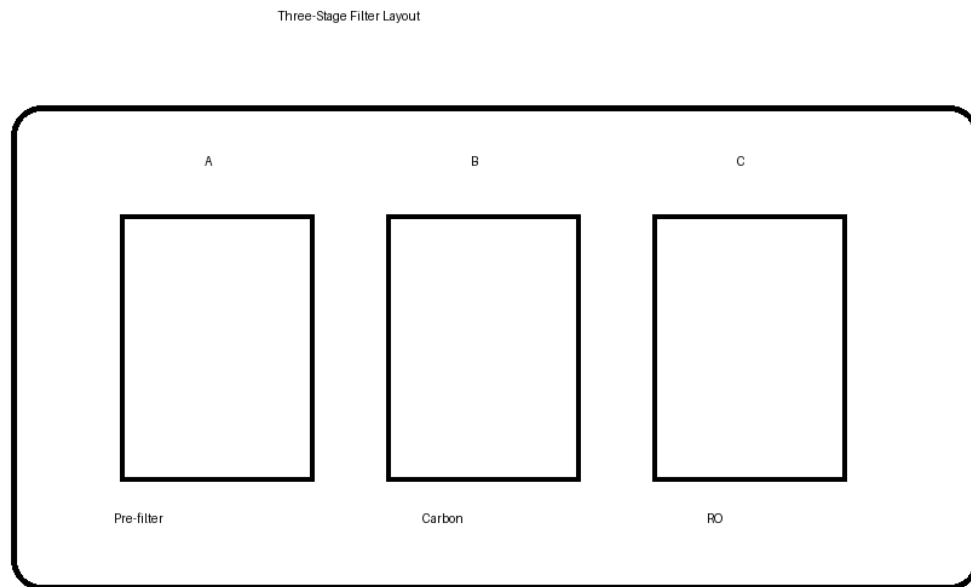

Figure 2: Water passes through Pre-filter (A), Carbon (B), and RO (C), in that order.

### 3. Water flow and maintenance

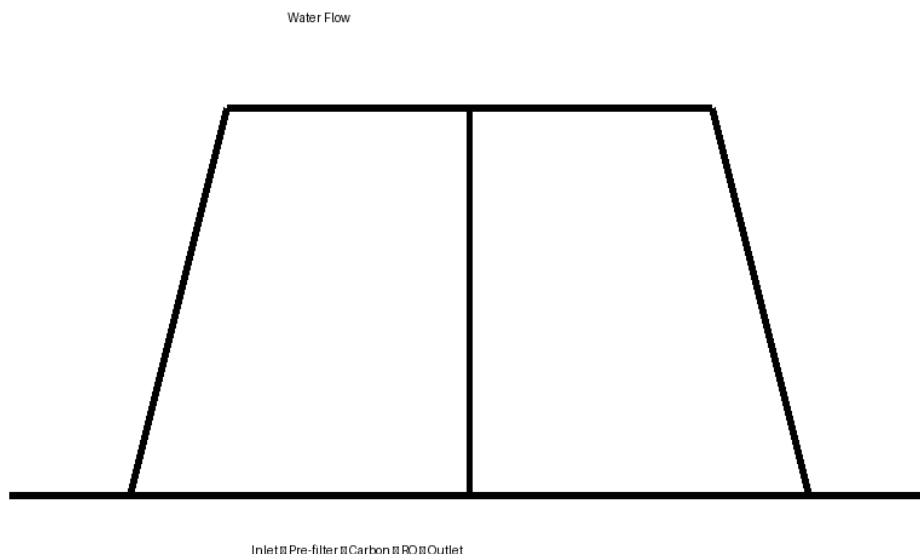

Figure 3: Water-flow sequence.

**Replacement schedule:** Pre-filter every 6 months; Carbon filter every 9 months; RO membrane every 18 months under normal household usage.

**After replacement:** Run one complete Flush cycle before returning to Normal mode.

**Low flow:** Check whether the pre-filter is clogged. If the filter indicator is red, inspect the pre-filter first.

**Unusual taste/odor:** Run Flush. If it continues, check carbon filter status.

**Leak detected:** Stop the appliance, close the inlet valve, and contact authorized service.

### 4. Troubleshooting

| Problem                | Likely cause            | Action                                           |
|------------------------|-------------------------|--------------------------------------------------|
| Low water flow         | Pre-filter restriction  | Inspect/replace pre-filter; run Flush            |
| Unusual taste          | Carbon filter exhausted | Check carbon filter status                       |
| Filter indicator red   | Filter-life threshold   | Identify indicated stage and replace             |
| Leak alarm             | Water in base           | Stop appliance; close inlet; contact service     |
| Display not responding | Power/control issue     | Power-cycle once; if unresolved, contact service |
